

CHOOSE THE BEST SPACE TO WORK TODAY

CHALLENGE

Allows your community to choose the best space to work every day.

KPIs AND INFORMATION

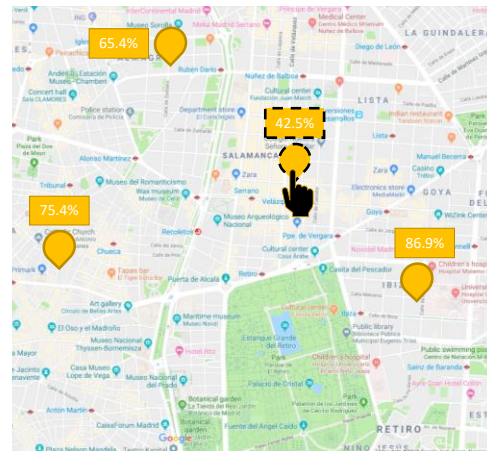

KPIs obtain by Cubelizer System:

- Real time occupancy ratio by different spaces, floors, tables and seats.
- Real time free and occupied seats.

Technology needed inside the Coworking Space:

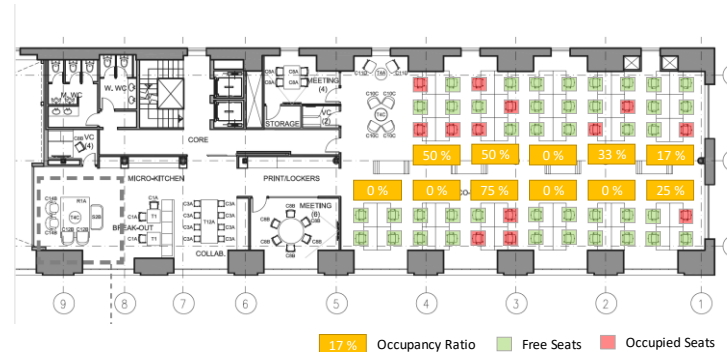

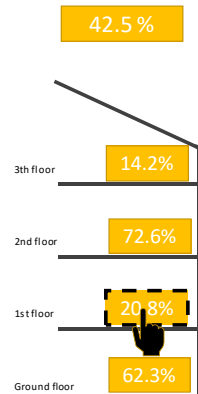

- App or web to integrate real time dashboard or API.

DASHBOARD – OCCUPANCY RATIO

First, the dashboard (or API) shows the **occupancy ratio of every coworking space** and allow us to choose the one who better fit to our needs.

Once we select one place, the dashboard offers more details of different levels and **individual workstations of each level.**

OUTCOMES

Knowing Real Time Occupancy allows coworking managers to offer coworkers the possibility to choose location based on their preferences for these day.

This freedom is going to impact positively in the community and the coworker's happiness (*).

For that, it could be necessary to integrate Cubelizer's dashboard into an app or web and if you want make a seat reservation.

(*). See the specific case study.
