

## Helping shopping centers create a safe place to be

Cubelizer helps shopping center managers become a safe place to be for the new normal life after COVID19. By gathering anonymous information about people flow with our computer vision solution, postCOVID19 control measures can be assessed and adapted, so malls can better take care of their visitors and employees.

### MONITORING SOCIAL DISTANCE

Check the accomplishment of visitor's social distancing and verify how preventing and information measures are working, and thus, adapt or change them. Share this information to create a trustworthy environment.

### CONTROL CAPACITY

In the new normal, capacity limitation will be mandatory from a health safety point of view. And knowing it in real time a must. Share this information with your visitors will increase calm and confidence in your mall or store.

### DEEPER SANITATION

Sanitation is the new grail. Establishing a correct protocol to improve hygienic cleaning system and verifying that is being accomplished will be one of the most important transparency exercises.

### MANAGING PEOPLE FLOW

Verifying the right use of flow circuits to avoid people crossing will help understand how good they have been designed, and in case, it shall help managers reinforce signages or communication.

Give your visitors more confidence: **MEASURE - ANALYZE - ACT - COMMUNICATE**
