

CUBELIZER

Smart management for safe and healthy workplaces

Cubelizer helps workplaces managers become their spaces into **healthy, safety and trusty** ones for their workforce in **the new normal life after COIVD19**. By gathering anonymous information about people flow with **our computer vision solution**, postCOVID19 control measures can be assessed and adapted, so **companies can better take care of their employees**.

MONITORING SOCIAL DISTANCE

Check the accomplishment of employees and visitors' social distancing and verify how preventing measures are working, and thus, adapt or change them.

CONTROL CAPACITY

Determine, in real time, how many people is inside an office to avoid crowded areas and ease social distancing. Share the information with users is a way to empower them.

DEEPER SANITIZATION

Reinforce hygienical cleaning and sanitization procedures, specially on the most used areas. Communicate the cleaning measures to reassure your employees.

CHECK OCCUPANCY

Check the workstations, meeting rooms or common areas occupancy and be sure that the social distance is accomplished, if not, change occupancy protocols to be safer.

MANAGE MEETING ROOMS USE

Manage the use of the meeting rooms by controlling capacity, identifying the correct use of seats, control inside social distance and cleaning them when used.

MANAGING QUEUES

Flow control overcrowded areas (canteens, common areas, coffee machine, etc.), take action and reduce the risk of spreading virus.

Give your workforce more confidence: **MEASURE - ANALYZE - ACT - COMMUNICATE**

GDPR Compliant

No images, no video, just anonymous data processing

REAL TIME DATA

Processing information in real time

PASSIVE DETECTION

No users collaboration
